Amigurumi Flower Pot Crochet Pattern

Free amigurumi pattern · 4 in / 10 cm · mardingezituru.com

A happy little flower pot: a terracotta pot with a face and a folded rim, brown soil on top, a green stem with two leaves and a white daisy with a yellow center. The flat base comes from one round in back loops, and the rim folds out on its own from one round in front loops.

It is about 4 in / 10 cm tall in DK cotton, a flower that never needs water. Every round has its stitch count.

Before you start

- Round 6 in back loops only turns the flat circle into the sides of the pot, so the base stays flat.
- Round 14 in front loops only makes the rim fold out. Fold it down with your fingers once the pot is done.
- A pipe cleaner in the stem keeps the flower upright, but leave it out for a toy for a small child.

FAQ

Can I make a rose or a tulip instead?

Yes: sew our crochet rose or the 5-petal flower on the stem instead of the daisy.

More garden makes: the bumble bee and the butterfly.
